Drug Rehabilitation Can Change Your Life

Battling addiction often leads to feelings of hopelessness and despair. However, as difficult as addiction may be to overcome, you can get your life back on the right track with support from an effective drug rehabilitation program. The purpose of these programs is to help you identify and understand the issues that led to your addiction in the first place, such as a past history of trauma and/or current stressors in your life. Once you understand these issues, you can address them directly with the proper treatment

so that they will no longer drive you to addiction. Drug rehabilitation programs also help you to learn more effective coping mechanisms so you won't be tempted to return to drugs or alcohol even after you have left the treatment facility.

Treatment at Renaissance Recovery Center

At Renaissance Recovery Center, we operate an intensive outpatient treatment program. Our program is faith-based, and we believe that every individual is capable of recovering from addiction with proper support. Our intensive outpatient program is 90 days in length and operated by licensed, experienced drug addiction counselors. Renaissance Recovery Center's program combines one-on-one counseling sessions, group sessions and family therapy sessions to provide the best outcomes for every patient. We also tailor each treatment plan based on patient needs and experiences. Medication-assisted treatment is available for patients who have addictions to certain types of drugs, including oxycodone, morphine and fentanyl.

In addition to our intensive outpatient program, we offer other services to patients in Scottsdale AZ as well. Some of the other services available from the Renaissance Recovery Center include support groups, family programs, interventions, and aftercare. In many cases, patients who enroll in the intensive outpatient program at our drug and alcohol rehab center will take advantage of our other services after graduating. Our goal is to provide support throughout the recovery process, even when intensive treatment is no longer necessary.

We offer a personalized and enhanced recovery experience since our drug and alcohol treatment program usually involves both clinical; driven methods and the faith-based 12 principles to promote long-term wellness. Our Scottsdale, Arizona treatment facility offers the following options:

90-Day Intensive Outpatient Treatment

Our outpatient program is 3 nights a week, 90 days in length. This includes at least 1 one-on-one counseling session each week, as well as family counseling. ***We have master-level therapists with years of extensive experience treating those suffering from addiction and mental issues.*** We also have smaller group sessions that create a more intimate setting.

60-Day Aftercare Program

We also offer a 60-day aftercare program that consists of at least one group session each week where several issues that are linked to long-term sobriety are candidly addressed. This is a critical step since ***we ensure continued support of all our patients to make the recovery journey a success.***

Customized Recovery Programs

Not everyone is the same. ***For the most successful recovery, we ensure that everyone's treatment plan is customized to meet their specific needs.*** We provide many different services to help those struggling with addiction. Our programs and approach include the following:

We Provide Referrals For Continued Success

We care deeply about the long-term recovery of our clients. This means helping out clients find the best possible resources to meet their specific needs. There are some services we do not offer, therefore we provide referrals for the following:

- **Inpatient Detoxification**
- **Suboxone Treatment**
- **Vivitrol/Naltrexone Treatment**
- **Inpatient Treatment/Rehabilitation**
- **Residential Treatment/Rehabilitation**
- **Sober Living/Transitional Housing**
- **Pornography/Sex Addiction**
